

The C³ Loop™ daily practice.

Centre · Clarify · Choose — the real-time operating sequence, built into one page a day. Biology dictates the order.

Sarah Anticich Consulting · The Executive Frame™

You cannot Clarify on an unstable nervous system, and you cannot Choose from fragmented attention. Centre, then Clarify, then Choose — then repeat.

Centre · Stability

Regulate. Stabilise the system — you cannot think clearly from high physiological arousal.

Clarify · Clarity

Understand. Restore accurate thinking — convincing is not the same as correct.

Choose · Agency

Act. Move toward what matters, not away from what frightens.

Today's practice

Date

Centre — how is my body right now, and what one thing will settle it? (breath, grounding, a soothing action)

Clarify — what is fact vs story today? What actually matters in the next few hours?

Choose — the one deliberate action I'll take, toward what matters

Repeat — where did I loop back today, and what did I notice?

Regulate before you reason. Sequence before you solve. Choose before you commit.
