

Intervention & Tool Map

One coherent pathway from referral and intake to practice, review and maintenance.

The organising rule

Every EF Health format uses the same sequence: Centre to restore Stability, Clarify to restore Clarity, and Choose to restore Agency. The format changes with need; the operating system does not.

CENTRE · STABILITY	CLARIFY · CLARITY	CHOOSE · AGENCY
Emotional regulation and nervous-system settling before interpretation.	Accurate thinking, attention structure and reduced cognitive load.	Values-aligned action, connection and sustainable follow-through.

Where each resource sits

Website stage	Primary resource	Role in the pathway
1 · Referral	Clinician Referral Form	Captures clinical context, urgency, risk and preferred delivery mode.
2 · Intake	Gut-Brain Intake Form + Consent	Establishes goals, daily impact, relevant history, privacy and service agreement.
3 · Foundation psychoeducation	Free Starter Bundle	Introduces one usable move in each phase and builds early confidence.
4 · Group programme	Zone Check-In + S.H.F.T.™ + C ³ Daily Practice	Creates shared language, in-session rehearsal and between-session repetition.
5 · eLearning	Programme Guide + Seven Written Modules	Provides the full sequenced learning pathway at the participant's pace.
6 · Individual therapy	All tools, selected clinically	Supports formulation-led adaptation for complexity, comorbidity or access needs.
7 · Review & maintenance	C ³ weekly rhythm + practice logs + flare plan	Tracks transfer, identifies barriers and supports relapse prevention.

Intervention fit

PSYCHOEDUCATION

Start with understanding

Free Starter Bundle · Zone Check-In · S.H.F.T.™ card

GROUP PROGRAMME

Practise with support

C³ Daily Practice · Zone Check-In · S.H.F.T.™ practice log

ELEARNING

Learn in sequence

Programme Guide · Seven Written Modules · downloadable practice tools

INDIVIDUAL THERAPY

Tailor to clinical need

Selected tools integrated with formulation and medical care

Website implementation note

On the EF Health page, place each download inside the relevant intervention card and repeat the same action labels across the site: Begin intake, Submit a referral, Start learning, Practise a tool, and Review progress. This reduces navigation decisions and preserves one source of truth.
