

Tracking Logs

Daily Capacity Check · Weekly Review · 12-Week Tracker — the three logs that keep the C³ Loop™ turning across a full programme.

LOG 1 · DAILY

Daily Capacity Check

A 1–10 read across Centre · Clarify · Choose, taken each morning, so you can right-size the day instead of discovering your limits by crashing into them. Low numbers are information, not failure — plan the day to match the capacity you actually have.

Centre: how regulated do I feel? · Clarify: how clear is my thinking? · Choose: how much deliberate choice do I have available?

Sun				

Rule of thumb: any domain at 4 or below means that phase leads the day. Two domains at 4 or below: Yellow-zone pacing. All three: Red-zone protocol.

LOG 2 · WEEKLY

Weekly Review — five questions

Ten minutes, once a week. Patterns live here, not in single days.

WEEK BEGINNING

OVERALL ZONE THIS WEEK (GREEN / YELLOW / RED)

1 · WHAT WENT BETTER THAN EXPECTED THIS WEEK — AND WHAT DID I DO TO MAKE THAT HAPPEN?

2 · WHEN DID SYMPTOMS SPIKE, AND WHAT WAS HAPPENING AROUND ME (LOAD, FOOD, SLEEP, EMOTION) AT THE TIME?

3 · WHICH TOOLS DID I ACTUALLY USE, AND WHICH ONE EARNED ITS PLACE?

4 · WHAT DID I AVOID THIS WEEK THAT MATTERS TO ME?

5 · WHAT IS THE ONE ADJUSTMENT FOR NEXT WEEK?

LOG 3 · PROGRAMME

12-Week Tracker — the long view

One line per week. Trends across twelve weeks tell you what single days never can — bring this to reviews at week 6 and week 12.
